

*Happy Building from Dumas Products Inc.*

## THE CITY OF BUFFALO

The City of Buffalo is a beautiful example of the Steamboats that flourished on the resort lakes of the north eastern United States in the late 1800's and early 1900's. Designed by Capt. J.W. Pierce, she was built in Jamestown, New York and launched in 1890 on Chautauqua Lake in New York.

One of 13 large (125') steamboats built entirely of wood and sheathed in steel, she served the region from 1890-1929. Unfortunately, like so many of her sisters, she was destroyed by fire in 1929. This 1/48" scale model of The City of Buffalo features a balsa planked over laser cut lite ply frame hull and uses a combination of balsa, poplar plywood, and expanded PVC through out the kit. The kit is beautifully detailed with cast metal pieces, laser cut components, flags, decals and much more. The construction documentation includes a full size plan sheet, a 57 page instruction manual, and a 30 page figure manual that features 70 individual drawings. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

**Additional parts needed to run your City of Bufalo:**

#2377 Running Hardware Kit

#2004 6v Motor

#8314 Electronic Speed Control

#8302 7.2v NiCad Battery Pack

#8315 NiCad Battery Charger

#8812-1 Radio Control (2 channel) w/ One Servo

**THE CITY OF BUFFALO • KIT #1270**

Length: 33" • Beam: 7 3/4" • Scale: 1/48 (1/4" = 1' 0")

Use Running Hardware Kit No. 2377 (Sold Separately)

# THOSE ELEGANT CLASSIC CHRIS CRAFTS®

Since 1990 we have been proud to be the exclusive licensed manufacturer of Chris Craft® model kits. While every model is unique in its style and representation of its era, there are many common features that tie the line together. All kits are CAD designed and feature the cleanest die cuts available.

Most kits utilize a combination of materials such as birch and mahogany, plywood, expanded PVC, and balsa, but what really sets off every Chris-Craft® kit is the beautiful mahogany veneer. Other materials include vacuum formed seats, chrome plated deck hardware, flags, decals, and complete driveline hardware including propeller.

Most importantly, each model includes clear concise plans and instructions to guide you through the assembly process. So, look them over and pick out a favorite. Nothing compares to a Dumas Chris-Craft®.

#8315 NiCad Charger  
#8812-2 Two Channel Radio

## 16' CHRIS-CRAFT® PAINTED RACER

The beautiful new Painter Racer is a fine example of the painted runabouts of the 1930's and 40's. It's red, white, and blue color scheme along with the rich mahogany accents separate this kit from others in the line.

Since this is a painted model the use of mahogany veneer is limited which translates to a great value price. The kit is constructed with balsa strip plank over die cut and laser cut frames. Besides the basic construction differences, this kit includes all the items you have come to expect from a Dumas Chris-Craft kit. Step-By-Step instructions, flag, decal, chrome plated fittings, aluminum accents, and complete drive line hardware.

**KIT #1263** • Length: 24" • Beam: 8 1/2" • Scale: 1/8th

## MINIATURE PIANO HINGE

15" pieces. If you are working on a Chris-Craft, here is your chance to add working hatch hinges. If you have already built one, this is your opportunity to retrofit your boat with functioning hinges.

KIT #2120 MINIATURE BRASS PIANO HINGE .360" X 15"

Since the introduction of our first Chris-Craft, customers have been asking for small working hinges to use for the hatches and engine compartments. Not only was this difficult to find, but once you did the price for a 6" piece was usually around 20.00. Well, we have lucked into a great source for miniature hinge and better still, the price is right. This brass piano hinge measures .360 fully opened and is sold in

## scale classic boat kits

### SC-1 CLASS SUB-CHASER

The sub-chaser prowled the waters in the Atlantic during WWI, during which time they were credited with sinking a number of U-boats. The SC class served a short time in WWII, but was soon replaced with a more powerful class of sub chasers. This kit features laser-cut plank-on-frame construction.

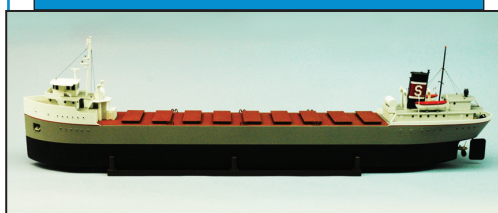

#### SC-1 CLASS SUB-CHASER KIT #1259

Length: 37-1/2" Beam: 4-3/4" Scale: 1/35th

#### Additional parts needed to run your SUB-CHASER

Use Running Hardware Kit #2372  
#2025 6v 10,000 RPM Motor  
#8314 Electronic Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Battery Charger  
#8812-1 Radio Control (2 chnl)

### GREAT LAKES FREIGHTER

Over the years one the most requested models for us to develop has been a freighter. So by popular demand we present our Great Lakes Freighter. Modeled after a 350' bulk carrier, our 1/96th semi-scale model of a Great Lakes Style Freighter makes a beautiful representation of the famous freighters. The hull and superstructure is constructed of highly conformable die cut expanded PVC over die cut plywood frames. There are detail parts galore including laser cut and cast parts, vacuum form life boats and stacks, decals and flag and more. Add to that the step-by-step building instructions and you are on your way to constructing your own miniature freight moving business. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

#### GREAT LAKES FREIGHTER KIT #1264

Length: 46" Beam: 6" Scale: 1/96th (1/8"=1'0")

#### Additional parts needed to run your GREAT LAKES FREIGHTER:

#2004 6v Motor  
#2374 Running Hardware Kit  
#8314 Electronic Speed Control  
#8812-1 Radio Control (2 chnl)  
#8302 7.2v NiCad Battery  
#8315 NiCad Battery Charger

### THE LACKAWANNA

The Dumas kit captures her beautiful lines and looks and is a fine addition to our line of tugboat models. At 33" long with a 6" beam, she is designed for two-channel radio control. Vacuum formed ABS plastic hull, die cut expanded PVC parts, balsa and plywood laser cut parts, and a very complete plan and instruction package are just a few of the features of the highly detailed model. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

#### THE LACKAWANNA TUG KIT #1251

Length: 33" Beam: 6" Scale: 1/48th approx.

#### Additional parts needed to run your LACKAWANNA TUG:

#2368 Running Hardware Kit  
#2004 6v Motor  
#2022 Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## CREOLE QUEEN

The Dumas model of the Creole Queen is constructed of precision die-cut birch and poplar plywood. The detail package included in the kit is immense. It has stampings, wood turnings, castings, plastic parts, and a 3 page decal set. Running hardware kit #2349 is the paddle wheel drive system for the model. It includes an internally reduced gear head motor that supplies the perfect speed to the paddle wheel. For the more adventurous, the size of the Creole Queen leaves the door wide open for those modelers wishing to try less conventional powering methods. Live steam would certainly be a possible option. So if you've always dreamed of building your own working stern wheeler, the Dumas Creole Queen is for you.

### THE CREOLE QUEEN KIT #1222

Length: 48" Beam: 10" Scale: 1/4 : 1

#### Additional parts needed to run your CREOLE QUEEN:

#2349 Running Hardware Kit  
(includes paddlewheel motor)  
#2023 Speed Control  
#2032 12v Battery  
#2028 12v Battery Charger  
#8812-2 Radio Control (2 chnl)

## DAUNTLESS

The kit Dauntless is made almost entirely of 1/8 in. poplar plywood. All parts are cleanly die-cut, and we have included a variety of detail parts including 38 cast metal fittings.

### THE DAUNTLESS KIT #1211

Length: 49 1/2" Beam: 14" Scale: 1/16th

#### Additional parts needed to run your DAUNTLESS:

#2332 Running Hardware Kit  
#2004 6v Motor(2)  
#2022 Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#3112/3113 3-Blade Prop  
#2018 Motor Couplings (2)  
#8812-2 Radio Control (2 chnl)

## LORD NELSON VICTORY TUG

The Victory Tug has long been a favorite at Dumas. At 28 inches long, it is perfect for those of us with smaller working areas. The quality materials, such as the balsa wood planking, and detailed fittings lead to an excellent building result. Basically, everybody loves tug boats, and the Victory Tug with all of her natural wood and scruffy good looks is an exceptional find. The Dumas model of the Victory Tug provides all the high quality materials necessary to complete the kit for a static model. Running hardware included.

### VICTORY TUG KIT #1225

Length: 28" Beam: 10" Scale: 1/16th

#### Additional parts needed to run your VICTORY TUG:

#2004 6v Motor  
#8302 7.2 NiCad Battery pack  
#8314 Electric Speed Control  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## NOAH'S ARK

#### NOAH'S ARK FEATURES:

Laser-cut wood parts  
Panel-on-frame construction  
Stand  
Die-cut PVC parts  
Running Hardware  
Noah & animals NOT included

### NOAH'S ARK KIT #1262

Length: 34" Beam: 8" Scale: 1/35th

#### Additional parts needed to run your NOAH'S ARK

#2025 6v 10,000 RPM Motor  
#8314 Electronic Speed Control  
#8812-1 Radio Control (2 chnl)  
#8302 7.2v NiCad Battery  
#8315 NiCad Battery Charger

## JERSEY CITY

A railroad tug from the 1960's, the Jersey City may still be seen working on the eastern seaboard. She is designed for radio control using a two-channel radio, or this detailed work horse would look great as a static model in your office or den. The kit features a vacuum formed plastic hull, die cut PVC superstructure, laser cut wood detail parts, and all the fittings and detail pieces to outfit her for a day on the job. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

### THE JERSEY CITY KIT #1248

Length: 36" Beam: 9" Scale: 1/32nd

#### Additional parts needed to run your JERSEY CITY TUG:

#2367 Running Hardware Kit  
#2004 6v motor  
#2022 Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## USCG 36500 36' MOTOR LIFEBOAT

The CG 36500 is famous for the rescue of 32 men from the tanker S. S. Pendleton, which broke in half during a winter storm off Chatham Bar, the elbow of Cape Cod (also known as New England's graveyard of ships). To this day, the saving of the Pendleton crew remains the single greatest small-boat rescue in the history of the United States Coast Guard. The crew received the Gold Life Saving Medal for hard work during this cold, dark rescue attempt. This is primarily a laser-cut wood kit and features plank on frame construction. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

### USCG 36500 36' MOTOR LIFEBOAT KIT #1258

Length: 27" Beam: 8" Scale: 1/16th

#### Additional parts needed to run your LIFEBOAT:

#2371 Running Hardware Kit  
#2025 6v 10,000 RPM Motor  
#8314 Electronic Speed Control  
#8812-1 Radio Control (2 chnl)  
#8302 7.2v NiCad Battery  
#8315 NiCad Battery Charger

## CAROL MORAN 1/72 nd SCALE HARBOR TUG

--With the introduction of the Carol Moran, we have broken into the new area of highly detailed scale R/C tugs. Our model of the Carol Moran features a two piece thermo-formed hull. The superstructure is constructed of highly conformable die-cut expanded pvc. There are detail parts galore including everything from laser cut and cast parts to decals and flag. Best of all, the Carol Moran is a full functioning R/C model. All the running hardware is included. So try your hand at the Carol Moran. An exceptional tug at an exceptional value.

### CAROL MORAN HARBOR TUG KIT #1250

Length: 17-3/4" Beam: 5" Scale: 1/72 nd

#### Additional parts needed to run your CAROL MORAN:

#8812-2 Radio Control (2 chnl)  
#2021 4.8 Volt Electric Motor  
Batteries to power the radio and servos

## AMERICAN BEAUTY

Here is your chance to try your hand at being a tow boat captain. Just so you know what you are up against, the American Beauty built by St. Louis Ships for Argi-Trans Services measures 170 feet in length, with a beam of 45 feet, and requires 9 feet of water when fully loaded with fuel. Powered by twin 2500 h.p. diesel engines turning two 8 ft. diameter propellers, she typically moves a tow of 20-25 barges each being approximately 200 feet long by 35 feet wide at speeds of 4 to 9 miles per hour. That is almost 4 acres of barges! Fortunately as modelers, we have life a little easier. The American Beauty starts off with an ABS plastic hull. The construction of the superstructure is accomplished through the use of precisely die-cut birch and poplar plywoods.

### AMERICAN BEAUTY KIT #1215

Length: 37" Beam: 12" Scale: 7/32" to 1"

#### Additional parts needed to run your AMERICAN BEAUTY:

#2339 Running Hardware Kit  
#2004 6v motor (2)  
#2022 6v Speed Control  
#2104 Deck Hardware Kit  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)  
#1219 Barge kit (2 barges)

## JOLLY JAY

The Jolly Jay is a scale model of a commercial fishing trawler built by the Thompson Trawler Inc. of Titusville, FL. The boat is used in the fish and shrimp industries off the Florida coast and the Gulf of Mexico. The original boat has a length of 60 ft. and a beam of 20 ft. It is powered by a 365 HP Caterpillar diesel driving a 60" propeller. With the capacity to hold 40 to 50 thousand lbs. of fish, the trawler can sustain a fishing trip of up to 30 days. The Jolly Jay has many things going for it, such as poplar plywood frames, balsa wood planking, pre-formed ABS plastic cabin parts, and complete drive line running hardware, including a 4.8 volt electric motor. Jolly Jay can be radio controlled with a two-channel radio or built for display only. Everyone is sure to enjoy the Jolly Jay.

### JOLLY JAY KIT #1231

Length: 24" Beam: 8-1/2" Scale: 1/30th

#### Additional parts needed to run your JOLLY JAY:

Running Hardware included in kit  
Batteries (available at any hobby shop)  
4.8v Motor included in kit  
#8812-2 Radio Control (2 chnl)  
#8314 Electronic Speed Control (optional)

## MT. WASHINGTON

The Dumas kit of The Mount Washington includes everything needed to bring the original grandeur back to life. A vacuum formed hull, and a die cut PVC superstructure provide the basic shape, while embossed plastic, cabin detail, cast metal fittings, and full color decals add the touches that make the model complete. Our step-by-step instructions will help you transform your kit into a historic model that will be sure to find a place in the history of your family.

### MOUNT WASHINGTON KIT #1235

Length: 44-1/2" Beam: 12" Scale: 1/48th

#### Running Hardware included in kit.

#### Additional parts needed to run your MT WASHINGTON:

#2029 Paddlewheel Motor  
#2023 12v Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## THE BROOKLYN

The Dumas kit of the Brooklyn is designed to give you the salty appearance of the original boat. Not just your average tug, the Brooklyn has the characteristics that set the early tugs apart. You get a vacuum formed hull, all the parts to build the conventional die cut superstructure, and enough detail (laser cut parts, lots of castings, brass railings, etc.) to keep you busy through many a long winter night. If you are one of many who admire the pugnacious spirit of tug boats then this one's for you. Another classic model from The Model Boat People. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

### BROOKLYN KIT# 1238

Length: 39-1/2" Beam: 9-1/2" Scale: 1/32nd

#### Additional parts needed to run your BROOKLYN:

#2364 Running Hardware Kit  
#2004 6v Motor  
#2022 6v Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## TYPHOON

Dumas brings the excitement of the roaring 20s with a 1/10th scale model of the TYPHOON. Our exact scale model is based on a full scale reproduction built by Mark Mason, owner of the New England Boat & Motor Co. The construction is a double-planked hull with balsa wood on the inside and mahogany strip planking on the outside. A complete set of chrome-plated deck fittings is included to add the touch of charm and excitement to the elegant racer. Vacuum form seats with full cockpit instrumentation add to the charm.

### TYPHOON KIT #1239

Length: 42 1/2" Beam: 8 1/2" Scale: 1/10th

#### Additional parts needed to run your TYPHOON:

#2025 6v 10,000 RPM Motor  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8314 Electronic Speed Control  
#8812-1 Radio Control (2 chnl)

## THE MYRTLE COREY

A Memphis River Tow Boat. The Myrtle Corey is a fine example of a late 1800's river towboat. Typical of the day, these boats were site built, without plans, with lots of substitutions, and jury rigged construction. Once commonplace along waters of the Mississippi and Arkansas rivers, the Dumas model of the Myrtle Corey is designed to bring that amazing era back to life. This kit features vacuum formed hull and roofs. The substructure is made from die-cut expanded PVC, and there is a load of strip wood to provide the boat with it's characteristic planked deck and cabin sides. Everything in this kit is designed for detail and realism. We include: castings, wood turnings, laser cut parts, and so much more. Even the paddlewheel and rudder hardware is included. So if you are thinking about trying your hand at something a little different, take a look at the Myrtle Corey.

### THE MYRTLE COREY KIT #1253

Length: 38" Beam: 8-1/4" Scale: 1/20th

#### Additional parts needed to run your MYRTLE COREY:

- #2029 12v Paddlewheel motor
- #2028 12v Battery Charger
- #2023 12v Speed Control
- #2032 12v Sealed-Lead Battery
- #8812-2 Radio Control (2 chnl)

## U.S.S. BLUEFISH (SS222)

Dive, dive, dive you are in the hunt deep in enemy water. Constantly checking your sonar screen, it is an international game of cat and mouse. All of a sudden you are rocked by a depth charge. After a breif black out, power is restored and you are diving using all your naval instincts to survive and complete this mission. You need to get them before they get you! Experience submarine action with the USS Bluefish (SS222). This 33 in. long model of a Gato/Balao class submarine has a beam of 4 in. and weighs approximately 5 pounds ready to run. The kit contains vacuum formed parts including hull, deck, motor mounts and sails, two 4.8v electric motors and complete drive line hardware.

### U.S.S. BLUEFISH (SS222) KIT #1245

Length: 33 " Beam: 4" Scale: 1/96th approx.

#### Additional parts needed to run your U.S.S. BLUEFISH:

- Minimum 3-Channel Radio Control
- #8302 7.2v NiCad Battery
- #8314 Electronic Speed Control
- (Recommended for pool use only.)
- Dive depth will vary with water condition.)

## USS WHITEHALL 180' PATROL CRAFT ESCORT

A 180' Patrol Craft Escort, The USS Whitehall was commissioned in 1944 and was named after the town of Whitehall, NY, the birthplace of the US Navy. She served along the east coast and then was sent to the South Seas where she did anti-submarine duty. The Dumas kit features a 2-piece vacuum formed hull, expanded PVC die-cuts, and laser cut balsa and birch plywood parts. Step-by-step instructions and name and number decals round out this Navy support ship kit.

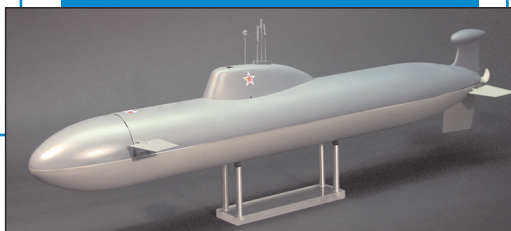

### USS WHITEHALL KIT #1252

Length: 23" Beam: 4" Scale: 1/96th

#### Additional parts needed to run your USS WHITEHALL:

- #2369 Running Hardware Kit (includes 4.8v motor)
- #8812-2 Radio Control (2 chnl)
- #1252 HRP 64-piece deck fitting set

## AKULA

In the early 1980's a totally different design of SSN (Nuclear Propelled Attack Submarine) was being produced at the Komsomlsk Shipyard. Given the designation Akula (which is Russian for shark) by NATO, the Akula has a surface displacement of 7500 tons and a submerged displacement of 10,000 tons. The Dumas version of the Akula is a dynamic diving submarine model, constructed of vacuum formed ABS plastic. The Akula is built by assembling the hull halves and adding the proper support pieces. The sealed equipment box provides excellent protection of the r/c components, while the separate battery box makes charging a snap. The Akula includes all necessary driveline hardware.

### AKULA KIT #1246

Length: 33" Beam: 4" Scale: 1/128th approx.

#### Additional parts needed to run your AKULA:

- #2004 6v Motor
- #8302 7.2v NiCad Battery
- #8314 Electronic Speed Control
- #8315 NiCad Charger
- Minimum 3 Channel Radio Control
- (Recommended for pool use only.)
- Dive depth will vary with water condition.)

## PT-109

The one and only PT-109 has been a standard of the Dumas line for well over 40 years. Over those years there have been many improvements on the original model and there has even been revisions on the revisions till we have gotten to where we are now. Our current version of the PT-109 uses a variety of materials to simplify and improve overall construction. Materials used include die-cut poplar plywood frames, die-cut birch plywood cabins, die-cut PVC external sheeting, cast metal deck fittings, laser cut details, vacuum formed parts, color decals, step-by-step instructions. Over 40 years and still going strong The One and Only PT-109

### PT-109 KIT #1233

Length: 33" Beam: 9" Scale: 1/30th

#### Additional parts needed to run your PT-109:

- #2362 Running Hardware Kit (single screw)
- #2025 6v 10,000 RPM Motor
- #8314 Electronic Speed Control
- #8302 7.2v NiCad Battery Pack
- #8315 NiCad Battery Charger
- #8812-1 Radio Control (2 channel)

## USS CROCKETT

The Dumas model of the Crockett is a builders boat. She features balsa plank over die-cut poplar frame construction for the hull, and conventional die-cut construction for the superstructure. #2105 is an optional deck hardware kit with more than 80 cast fittings. Included in the deck hardware are all the armaments needed to send her into battle. #2341 is the twin screw running hardware kit used to drive the Crockett. It has everything needed to complete your drive line except motors. Use two Dumas motors #2004 for 6v power. If you are a military enthusiast you will certainly want to try your hand at the Dumas USS Crockett.

### USS CROCKETT KIT #1218

Length: 51" Beam: 7-1/2" Scale: 5/16" to 1"

#### Additional parts needed to run your USS CROCKETT:

- #2105 Deck Hardware Kit
- #2341 Running Hardware Kit
- #2004 6v Motor (2)
- #2022 6v Speed Control
- #8302 7.2v NiCad Battery
- #8315 NiCad Charger
- #8812-2 Radio Control (2 chnl)

## U.S. ARMY 74' ST TUG

During WWII, the US Army operated a large fleet of ships. The primary task was to support the fighting man on the ground. Small harbor tugs, designed as ST, were used in large number by the Army to move ships in port and haul fuel and supply barges.

**Kit features:**  
2-piece Vacuum Form plastic hull  
Die-cut PVC structure  
Laser-cut details  
Full color decals  
Running hardware included  
(4.8v motor sold separately).

**U.S. ARMY 74' ST TUG KIT #1256**  
**Length: 18" Beam: 4-3/4" Scale: 1/48th**

**Additional parts needed to run your U.S. ARMY 74' ST TUG**  
#2021 Dumas 4.8v Motor  
#8812-2 2 Channel Radio Control

## USCG 41' UTILITY BOAT

The USCG 41' Utility Boat gives the modeler the chance to feel all the excitement of the US Coast Guard without getting dirty. The kit features all wood construction and 32 deck fittings.

**USCG 41' UTILITY BOAT KIT #1214**  
**Length: 31" Beam: 10" Scale: 1/16th**

**Additional parts needed to run your USCG 41' UTILITY BOAT:**  
#2337 Running Hardware Kit  
#2004 6v Motor (2)  
#2022 6v Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## USCG 44' LIFEBOAT

The USCG 44' Lifeboat kit features all wood plank on frame balsa construction with a die-cut superstructure. The 39 cast fittings and Coast Guard insignia finishes it off.

**USCG 44' LIFEBOAT KIT #1203**  
**Length: 33" Beam: 9-1/2" Scale: 1/16th**

**Additional parts needed to run your USCG 44' LIFEBOAT:**  
#2335 Running Hardware Kit  
#2004 6v Motor (2)  
#2022 6v Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Charger  
#8812-2 Radio Control (2 chnl)

## THE GEORGE W. WASHBURN

The George W. Washburn was launched in 1890 by the Cornell Steamboat Company to move barges and cargo like stones, sand, and bricks up and down the Hudson River between Albany and New York City. She was, during her early years, considered the fastest tug on the Hudson. Since she took on paying passengers, her appearance was kept up. It was said that a Cornell Steamboat could be noticed from great distances by the yellow and black color of the smoke stacks. Sad to say, however, that the George W. Washburn and Cornell Steamboat Company are no longer around today. This kit features laser-cut plank-on-frame construction. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

**THE GEORGE W. WASHBURN KIT #1260**  
**Length: 30" Beam: 5-1/2" Scale: 1/48th**

**Additional parts needed to run your GEORGE W. WASHBURN:**  
#2373 Running Hardware Kit  
#2004 6v Motor  
#8302 7.2v NiCad Battery  
#8314 Electronic Speed Control  
#8315 NiCad Battery Charger  
#8812-1 Radio Control (2 chnl)

## PT-212 78' HIGGINS PATROL TORPEDO BOAT

The 78' Higgins Patrol Torpedo Boat served in the Mediterranean theater of operation during WWII with distinction.

**Kit Features:**  
Vacuum-Formed Hull  
Scale Decals  
Laser Cut Parts  
Die-Cut Parts  
Step-by-step Instructions

**PT-212 78' HIGGINS PATROL TORPEDO BOAT KIT #1257**

**Length: 30-1/2" Beam: 8" Scale: 1/30th**

**Additional parts needed to run your PT-212 78' HIGGINS PATROL TORPEDO BOAT:**  
#2370 Running Hardware Kit  
#2025 Dumas 6v 10,000 RPM Electric Motor  
#8302 7.2v NiCad Battery Pack

#2032 12v Battery  
#2028 12v Battery Charger  
**Or**  
#2004 6v Motor (2)  
#2022 6v Speed Control  
#8302 7.2v NiCad Battery  
#8315 NiCad Battery Charger

## JENNY LEE TUG

The Jenny Lee is about 50% fact, 50% fiction but certainly 100% enjoyable. This kit is loosely modeled after the site built tugs of the early 1900's. Designed to give an introductory experience in plank on frame construction, the model features balsa strip planks over poplar laser cut frames.

Some of the detail elements include cast metal fittings, wood turnings, vacuum forms, color decals and laser cut detail parts. The plans and instructions are designed so even the first time modeler will feel at ease and if you are an experienced modeler, let's face it, no one ever complains about having too much instruction, and you can have a ball adding tons of extra details. So if you love tugs please consider the Jenny Lee, our latest entry in the long Dumas tradition of quality tug-boat kits. **Please note:** Some of the running hardware parts are called for early in the construction of the model.

### JENNY LEE TUG KIT #1268

Length: 24" Beam: 7-1/4" Scale: 1/32 (3/8"= 1' 0")

Additional parts needed to run your Jenny Lee Tug:

- #2375 Running Hardware Kit
- #2004 6v Motor
- #8314 Electronic Speed Control
- #8302 7.2v NiCad Battery Pack
- #8315 NiCad Battery Charger
- #8812-1 Radio Control (2 channel) w/ One Servo

## SAN PEDRO

Our new model of the San Pedro Push Tug is a fine example of the small push tugs used for fleeting barges to and from terminals to line-haul tows. Small in size yet remarkably powerful you can always spot tugs that strictly push by the absence of aft towing bitts. The front stairs are designed for easy access from boat to barge. Small, Powerful, and Efficient.

The Dumas model of The San Pedro is designed to be a great introduction into scale modeling. The kit features laser and die-cut construction using a combination of poplar lite-ply and expanded PVC. Building process is step by step with enough detail features to bring the model to life. Newer modelers will be impressed with where their efforts take them, while experienced builders will appreciate that the model leaves them plenty of room for customization and personal details.

### SAN PEDRO KIT #1269

Length: 30" Beam: 12" Scale: 1/32 (3/8"= 1' 0")

Additional parts needed to run your San Pedro Push Tug:

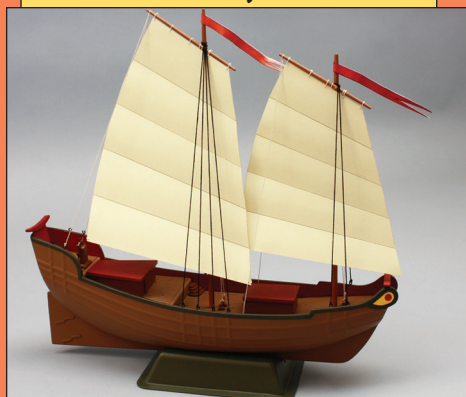

- #2376 Twin Screw Running Hardware Kit
- #2004 6v Motor (Uses 2)
- #8314 Electronic Speed Control
- #8302 7.2v NiCad Battery Pack
- #8315 NiCad Battery Charger
- #8812-1 Radio Control (2 channel) w/ One Servo

## HISTORIC SHIPS for Junior Modelers

### JUNIOR MODELER BOATS FEATURE:

- Vacuum formed hull and deck
- Laser cut wood parts
- Paper sails (Junk & Viking Ship)
- Stand
- Step-by-step instructions

## THE TUNA CLIPPER

Over the years, one of our all time popular kits has been our scale version of Campbell Industries 220' purse seiner. This highly detailed 37" kit is beautiful as is. Likewise, there is plenty of room for those personal touches. The kit offers quality diecut construction with mahogany planking. Deck hardware is included as is the shaft, stuffing box, and rudder. If scale is your cup of tea, you'll love this classic at its low price.

**TUNA CLIPPER KIT #1204**  
Length: 37" Beam: 7" Scale: 1/30th

## PAY 'N PAK

The Pay 'N Pak is a good running, stable hydroplane and is radio controllable using a two channel radio. So, whether you are in competitive racing or just out to have fun, the Pay 'N Pak will provide you with either. It's made of rugged poplar and birch plywood and uses running hardware kit #2322.

**PAY 'N PAK KIT #1310**  
Length: 30" Beam: 13-1/2"

**Running Hardware Kit #2322**  
solid shaft drive line for engines with a 1/4-28 size engine shaft (Male universal not included)  
Power: .20 or 3.5cc gas marine engine

## MISS UNLIMITED

As one of the oldest models in our line, the kit on the Miss Unlimited was originally designed for tether racing. It is a mahogany and plywood kit and requires a .29 or .35 engine. Use running hardware kit #2351. The boat is adaptable to R/C but is not covered in the instructions. Please note decals are no longer included or available for the model.

**MISS UNLIMITED KIT #1305**  
Length 36"  
**Running Hardware Kit: #2351**  
Power .29 or .35 gas marine engine

## HALF-PINT CABIN CRUISER

Made from die cut poplar and birch plywood and mahogany veneer, the Half-Pint is a good choice for the modeler who likes the dark rich look of natural wood. For fast and easy electric power use running hardware kit #2331, which comes complete with a 4.8 volt Dumas motor. For those looking for a little more speed the Half-Pint can also be powered by gas, using a .049 engine, running hardware kit #2314.

**HALF-PINT CABIN CRUISER KIT #1209**  
Length: 18" Beam: 6-3/4"

**Running Hardware Kit #2331**  
for electric power (includes motor)

**Running Hardware Kit #2314**  
for .049 gas engine

## SK-DADDLE

For full bore running, this model of the Hallet SK boat can be lots of fun. The kit is made up of pre-cut birch and poplar plywood. The SK-Daddle is designed for a .19-.40 size gas marine engine and Dumas running hardware kit #2351. Use a 2 channel radio and you are ready for speed

**SK-DADDLE KIT #1401**  
Length: 36" Beam: 14"

**Running Hardware Kit #2351**  
solid shaft angled drive  
Power: .19-.40 size gas marine engine

## SK-DADDLE TOO

The SK-Daddle Too is another of the famous Hallet SK boats, this boat is great for drag racing or just for fun. This all die-cut poplar and birch plywood kit has plenty of room for easy engine and radio access. Designed for a .15 to .21 marine engine, use Dumas running hardware kit #2302.

**SK-DADDLE TOO KIT # 1402**  
Length 27" Beam 10-1/2"

**Running Hardware #2302** solid shaft drive line  
Power .15 to .21 marine engine

The SK-Daddle Jr. is an all wood kit that is designed for either gas or electric power. The kit consists of birch and poplar die-cuts with step by step written instructions and full size plans. Use running hardware #2314 for .049 gas engine or running hardware #2331 for electric power. Motor is included in #2331.

**SK-DADDLE JR. #1403**  
Length 18" Beam 7-3/4"

Power .049 engine or electric motor

**Running Hardware #2314** for .049 engine  
**#2331 for electric power** (motor included)

# sweet deals

## OSPREY

This all wood kit is a model of a New England style fishing boat. Kit includes driveline hardware and scale detail parts.

Running Hardware: Included in kit  
Power: Dumas # 2021 4.8 volt motor

### THE OSPREY KIT #1242

Length: 24-1/2" Beam: 9-7/8"

## THE AMERICAN ENTERPRISE

This all wood kit is engineered out of top grade birch and poplar plywood, precision die-cut for an exacting fit. A 27 piece cast fittings set is included, as well as many other detail items. The Enterprise runs beautifully as a scale model with two Dumas #2004 or #2005 electric motors. But her sleek lines may make you want to push her to the limit. Perfectly suited for twin high speed electric or two gas engines. Use running hardware #2332 for all twin power systems.

### THE AMERICAN ENTERPRISE KIT # 1213

Length: 52" Beam: 12" Scale: 1/2": 1'

#### Running Hardware: #2332

#2332 for all twin screw powering methods

Power: 2 Dumas #2004 6 volt motors or #2005 12 volt motors, 2 High speed electric motors, 2 3.5cc size gas marine engines

## U.S.C.G. 40' UTILITY BOAT

The Dumas version of the U.S.C.G. 40' Utility Boat is a faithful 7/8":1' reproduction of the full size craft. This wood kit features die-cut frames with a strip planked balsa wood hull, a 27 piece cast fitting set, and dramatically reproduced Coast Guard insignia decals. Set up for a single Dumas #2004 electric motor.

### U.S.C.G. 40' UTILITY BOAT KIT #1210

Length: 35" Beam: 10" Scale: 7/8":1'

#### Running Hardware: #2329

for twin screws turning the same direction  
Power: 1 Dumas #2004 6 volt motor

## U.S.C.G. 41' UTILITY BOAT

Kit #1216 is our 15" shelf model of the 41' Utility Boat. The kit features beautifully die-cut birch plywood parts and a top notch fittings package with 19 cast metal parts. The kit even includes running hardware, so simply by adding your choice of motor it is able to be run in a swimming pool or small pond. Decals no longer available.

### U.S.C.G. 41' UTILITY BOAT KIT #1216

Length: 15" Beam: 5" Scale: 3/8":1'

## SHELLEY FOSS

The only difference in these two all wood kits is their size!

### SHELLEY FOSS KIT#1207

Length: 36" Beam: 12" Scale: 1/30th

Power: 2 Dumas #2004 6 volt motors or #2005 12 volt motors

Running Hardware: #2312 for twin screws turning in opposite directions.

#### Running Hardware Kit #2312

### LI'L SHELLEY FOSS KIT #1206

Length: 24" Beam: 8" Scale: 1/45th

Power: 1 Dumas #2004 6 volt motor

Running Hardware: #2359 for twin screws turning in opposite directions.

#### Running Hardware Kit #2359

## HUSON 24

If you prefer more of a builders boat, the wood kit would be your cup of tea. Kit will require a 2-channel radio for operation. You don't need a sail control unit, simply use one of the R/C servos from your radio. A simple and fun way to enjoy R/C sailing.

### HUSON 24-WOOD KIT #1117

Length: 24" Beam: 6 3/4" Mast: 31

# sailboats

## 30" STAR

A thrill to sail, exciting to race: the full size Star was designed and built in 1911 yet remains an Olympic Class favorite. This all wood kit gives you rich mahogany planking over a plywood frame and precision die-cut wood pieces. The kit contains complete fittings and cut and sewn sails. She's as handsome as her full size counterpart. Use a Dumas #3702 sail control unit and 2-channel radio and you are ready for hours of sailing enjoyment.

Length: 30" Beam: 7-5/8" Mast: 44"  
Sail Control Unit: #3702  
**30" STAR KIT #1121**  
**SAIL CONTROL UNIT #3702**

## ACE SLOOP

A free sailing model for small lakes or swimming pools. Built from die-cut mahogany with 21" birch mast and cloth sails. All rigging and fittings are included.

Length: 17" Beam: 5-1/4" Mast: 21"  
**ACE SLOOP KIT #1102**

## 19" LIGHTNING

If you prefer the leisurely pace of free sailing (just watching your boat go where the wind takes it), the Lightning is for you. This 1": 1" scale replica of the Lightning Class boat also makes a beautiful display model for your office or living room. This kit is made up of laser cut balsa wood frames and handsome mahogany planking. Nylon sails add the finishing touch to this kit.

Length: 19" Beam: 6-1/2" Mast: 26"  
Sail Control Unit: Not designed for radio control

**19" LIGHTNING KIT #1110**

## HOBIE CAT

This scale model of the popular west coast catamaran, the Hobie Cat 14 is an all wood kit that includes nylon sails. It's easy to build and she's fast and fun to free sail.

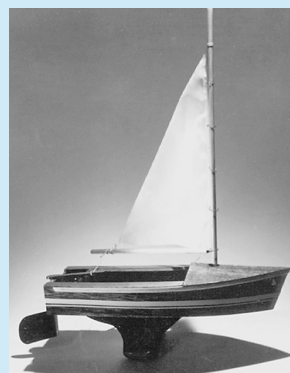

Length: 14" Beam: 7-3/4" Mast: 22-1/4"  
Sail Control Unit: Not designed for radio control  
**HOBIE CAT #1101**

## THE SNIPE

This simple line sailboat has been a favorite for years and is now available in kit form. This all wood kit is an excellent choice for a first time builder and will give them good building experience enabling them to move up to a larger model. Experienced builders will want to build it for fun and will want to see the great finish they can put down on the rich mahogany decking. The kit includes materials to make the stand, sails, and all the rigging. The model is for static display only. This makes a great kit to start with whether you are building it by yourself or with a friend.

Length: 16" Beam: 5-1/4"  
Mast Height: 19"  
**THE SNIPE KIT #1122**

## SAILBOAT

When we say fun for the entire family, we mean everyone. This simple sailboat kit is designed so that even younger children can enjoy the creative satisfaction of building a model boat. It will make a great gift for the younger model boat builders.

Length: 12"  
**SAILBOAT KIT #1007**

## DN ICEBOAT

We believe this static display all-wood kit model is the only kit of an iceboat on the market today. A fun little boat, it is constructed out of poplar and birch plywood and covered with mahogany veneer. Kit includes sails and all rigging material. This great little kit will make a nice addition to any modelers fleet, young or old.

Length: 19-1/2" Beam: 10-1/2"  
Height: 22-1/2"

**DN ICEBOAT KIT #1123**

## SKIPJACK

This beautifully crafted model kit of a classic Skipjack contains all the necessary items for the construction of a first class static model. One of the many advantages of laser cutting is its ability to provide fine detail such as precise notches and perfectly scribed decks as furnished in this kit. That combined with the full size plans, step-by-step instructions and highest quality materials leads to a finished result you will be proud to display in your home or office. Count on Dumas for the finest in laser cut models

Length: 16-3/4" Beam: 4-3/4"  
Scale: 1/48th (1/4" = 1')

Running Hardware Kit: Static model none required

**SKIPJACK Kit #1704**

# hydros-deep vees-sks

## MISS CIRCUS CIRCUS

With a pre-formed center section and premium die-cut plywood construction, your Circus Circus will seem to materialize on your work bench. Three shades of hot pink and ice white make a color statement that no one can ignore. A complete set of lettering and logo decals will add the finishing touches to your model. Dumas engineered this kit to make you look like a pro both on and off the water

### MISS CIRCUS CIRCUS KIT #1325

Length: 43" Beam: 21" Scale: 1/8th  
Running Hardware Kit #2346  
Power: .60-.82 gas marine engine

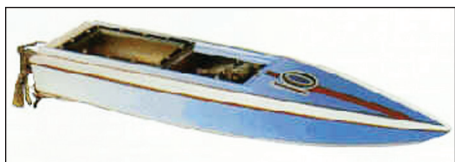

## HOT SHOT SPRINT 3.5

This 24 in. tunnel hull is a water ripper that is sure to please everyone, beginner and pro alike. This kit features precision die-cut plywood construction and a preformed ABS cowl. Step by step instructions with lots of photos and a complete plan set that makes building a SNAP. We have even included the building jig, complete steering and throttle linkage in the kit! You're two feet ahead of the competition with the Dumas Hot Shot Sprint 3.5

### HOT SHOT SPRINT 3.5 KIT #1326

Length: 24" Beam: 11-1/4"  
Power: 3.5cc outboard motor

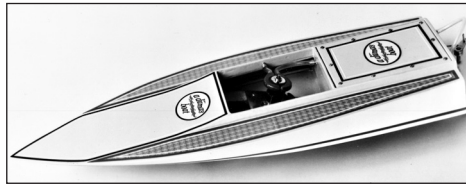

## SHORT STUFF DV-10

The Short Stuff is a good kit for the person looking for a first time boat that is radio controllable. Short Stuff, also known as Deep Vee 10, is a wood kit. It is made up of birch and poplar plywood, is easy to assemble and can be powered by either gas or electric.

### SHORT STUFF DV-10 KIT #1411

Length: 18" Beam: 6-1/4"  
Running Hardware Kit #2334  
Power: .10 gas marine engine

## VEE BOTTOM SK BOAT

The SkeeVee 10 looks and performs like the big ones! Her vee bottom gives her stability in rough water. This all wood kit is a good one for the first time boat builder and R/C operator to get started with.

### VEE BOTTOM SK BOAT KIT #1410

Length: 18" Beam: 7"  
Running Hardware Kit #2334  
Power: .10 gas marine engine

# AIRBOATS

## BIG SWAMP BUGGY

### BIG SWAMP BUGGY KIT #1505

Length: 31" Beam: 17-1/2"

Power: .40-.60 gas airplane engine

This boat was designed for fun for both model boat and model airplane enthusiasts. You can glide this boat over the water and up on shore just like the full size ones in the Everglades. This mahogany and birch plywood kit is easy to assemble and is built to last. No running hardware kit is required. You will need a 2 channel radio.

## SWAMP BUGGY

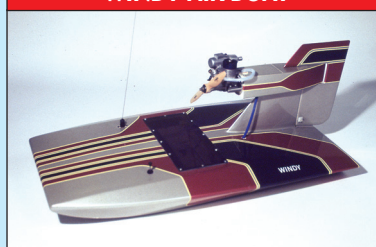

### SWAMP BUGGY KIT #1501

Length: 28" Beam: 10"

Power: .19-.21 gas airplane engine with airplane pusher prop.

A real fun boat in any kind of water! This model of a Florida swamp buggy is powered by a .19-.21 size gas engine and a pusher airplane prop. It is an all wood kit consisting of precision die cut birch and mahogany plywood parts. This rugged little boat will require a 2 channel radio for R/C operation, but no running hardware kit is required.

## WINDY AIR BOAT

### WINDY AIR BOAT KIT #1506

Length: 23" Beam: 12"

Power: .10 gas airplane engine

The sleek lines of Windy means awesome looks and performance. This boat looks fast just sitting still. Windy is an all wood kit made up of birch and mahogany plywood. Like all of our air boats, Windy requires no running hardware kit and is powered by a .10 size gas airplane engine. Sleekness, style, and speed, Windy has it all. You will need a 2 channel radio.

## LI'L SWAMP BUGGY

### LI'L SWAMP BUGGY KIT #1502

Length: 18" Beam: 7-1/4"

Power: .049 gas engine.

This smaller version of the Swamp Buggy can be set up for 2 channel radio control or free running. Either way the Little Swamp Buggy is a good beginners kit for both building and running. The kit is made up of birch and mahogany plywood and will require a .049 size gas engine for power. No running hardware required.

# 17½" walnut scale rubber powered

## LASER CUT FLYING MODELS

*Our line of Walnut Scale planes are so chocked full of quality features that building has once again become part of the fun.*

*Beginners will be astonished by the ease of construction, while experieced modelers will appreciate the quality materials and precision laser cut parts.*

*Our selections represent exciting subject matter that captures the best model aviation has to offer.*

*Besides offering the cleanest laser cuts and the most comprehensive plans of any free flight kit, we provide the followig features:*

- Hand Selected Balsa
- Plastic Propeller
- F.A.I. Tan Sport Rubber
- Vacuum Molded Parts (where required)
- Color Peel & Stick Decal Set (where required)
- Full Size Plan
- Step by Step Instructions

### *Quality features that make up every Dumas Airplane kit*

Besides offering the cleanest laser cuts and the most comprehensive plans of any free light kit, we provide the following quality features

- Hand Selected Balsa
- Color Peel & Stick Decal Set (as required)
- Plastic Propeller
- Full Size Plan
- Contest Rubber
- Vacuum Molded Parts (as required)
- Lightweight Colored Tissue
- Step-by-Step Instructions

## LASER CUT FLYING MODELS

For your building & flying pleasure

*We know you love to build.  
Now enjoy the fun of electric R/C  
with our exciting new kits.*

This line is designed for the electric flyer who likes to have choices.

The models in this series were selected for their appeal, interest, and most important their fine flying characteristics. We have sized each model to make it the best electric flyer it can be, and each kit uses affordable readily available flying packages.

### Each kit features:

- Laser Cut Parts
- Hand Selected Balsa
- Full Size Plan
- Step-By-Step Instructions
- Color Decals (where required)
- Vacuum Molded Parts
- Light Weight Colored Tissue

**PIETERPOL AIR CAMPER**  
KIT #1803 • 36" Wingspan

# DUMAS PRODUCTS

## Running Accessories

### 6 VOLT AND 12 VOLT ELECTRIC MOTORS

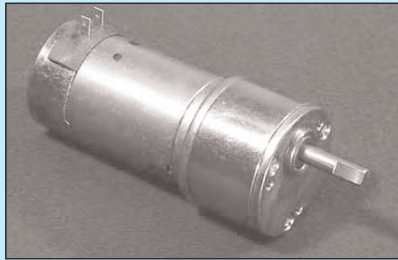

These heavy duty motors are nothing but work horses. They are plain, simple, and built to last like no other motor. Dumas has the only motors you'll need for scale power.

**6 VOLT ELECTRIC MOTOR** - 4 Amperes Max, 5,000 RPM max (no load). Motor includes 2 brass couplings, coupling rod, mounting screws, and bracket. Use with Dumas #2022 Speed Control. **STOCK #2004**

**12 VOLT ELECTRIC MOTOR** - 2 Amperes Max, 5,000 RPM max (no load). Motor includes 2 brass couplings, coupling rod, mounting screws, and bracket. Use with Dumas #2023 Speed Control. **STOCK #2005**

### 12 VOLT PADDLEWHEEL MOTOR

Gearhead 60.5 : 1 reduction paddlewheel motor used for:

Creole Queen kit #1222  
Mt. Washington kit #1235  
Myrtle Corey kit #1253

**STOCK #2029**

### SEALED LEAD ACID BATTERIES

These rechargeable batteries are very versatile. Due to their completely dry chemistry they can be placed in any position without fear of leaking. This makes them perfect for fitting into unusual

places. These are a trickle charge type batteries, and depending on the level of discharge, can take from 8 to 20 hours to recharge. This battery can be configured for 6V 5 amp or 12V 2.5 amp power.

#### SEALED LEAD ACID BATTERY

Measurements: 1-3/4"W x 2 5/8"H x 4-1/4"L. Weight 2-1/4 pounds (2 packs). Use Dumas #2028 Battery Charger. **STOCK #2032**

**BATTERY CHARGER FOR #2032 BATTERY**  
**STOCK #2028**

### 6 VOLT HIGH SPEED MOTOR

An excellent general purpose motor for models 36" and under. The motor is also used to power most of our Chris-Craft® Kits.

**STOCK #2025**

### 3 AND 4 BLADED BRASS PROPS

Put the finishing touches on your masterpiece with these brass propellers. The props range in diameter from 1-1/2" to 3-1/2" and all have a 2" pitch. These soldered blade props arrive in a bright brass finish and should not require any balancing. They are designed to thread on to the 3/16" shafts threaded 10-32 and 1/8" shafts threaded 5-40. The three bladed propellers have a tail nut on the hub, while the four bladed propellers include a separate tail nut. Our three and four bladed brass props are manufactured by Raboesch of Holland.

STOCK #	DESCRIPTION	DIA	SHAFT
3108	Prop 3 Blade RH	3"	3/16"
3109	Prop 3 Blade LH	3"	3/16"
3110	Prop 3 Blade RH	2-1/2"	3/16"
3111	Prop 3 Blade LH	2-1/2"	3/16"
3112	Prop 3 Blade RH	2"	3/16"
3113	Prop 3 Blade LH	2"	3/16"
3114	Prop 3 Blade RH	1-3/4"	3/16"

3134	Prop 3 Blade LH	1"	1/8"
3135	Prop 3 Blade RH	3/4"	1/8"
3136	Prop 3 Blade LH	3/4"	1/8"

### 2 BLADED PLASTIC PROPS

STOCK #	DESCRIPTION	DIA	SHAFT
3001	Prop 2 Blade LH	1"	1/8"
3002	Prop 2 Blade LH	1-1/4"	1/8"
3003	Prop 2 Blade LH	1-3/4"	1/8"
3004	Prop 2 Blade LH	1-3/4"	3/16"

### 6 VOLT AND 12 VOLT SPEED CONTROLS

These resistor type speed controls have variable speed forward, variable speed reverse and dead stop. This allows for precision and scale-like maneuvers. One speed control can handle one or two motors. Please note that the Dumas speed controls are not for use with the Dumas #2025 electric motor.

**6 VOLT SPEED CONTROL** Use with Dumas #2004 6 Volt Electric Motor. 7 AMP Max. Will control 2 motors. Measurements: 2-1/8"H x 1-1/8"W x 3-1/4"L. Weight: 4 ounces. **STOCK #2022**

**12 VOLT SPEED CONTROL** Use with Dumas #2005 12 Volt Electric Motor 5 AMP Max. Will control 2 motors. Measurements: 2-1/8"H x 1-1/8"W x 3-1/4"L. Weight: 4 ounces. **STOCK #2023**

### 4.8 VOLT MOTOR

Great for boats 16" to 20" long. Will run 4.8 to 7.2 volts. Also the replacement motors for the USS Bluefish.

**STOCK #2021**

2105	Deck Hardware for Kit #1218
2120	Miniature Brass Plated Piano Hinge .360" x 15"

### SOLID SHAFT RUNNING HARDWARE KITS

Kit#	Hardware Designed for
2302	1305/1402 (.19 gas engine - shaft size 1/4-28)
2312	1207 (2 elec. motors - props opp. direction)
2314	1209/1403/1410/1411 (.049 gas engine - shaft size 5-40)
2322	1310 (.19 gas engine - shaft size 1/4-28).
2329	1210 (elec. motor - props same direction)
2331	16-20" boats (4.8v motor included)
2332	1211/1213 (2 gas or elec. motors - .21 max gas size)
2335	1203/1205 (elec. motor - props opp. direction)
2336	1410/1411 (.05 elec. motor)
2337	1214 (for 2 electric motors)
2339	1215 (for 2 elec. motors)
2341	1218/1211/1213 (for 2 elec. motors)
2349	1222 (incl. 12v gearhead motor- drive belt)
2351	1305/1401 (.35 gas engine - shaft size 1/4-28)
2359	1206 - Little Shelley Foss
2362	1233 - 33" PT-109
2364	1238 - Brooklyn Tug
2366	1244 - Chris-Craft Commander Express Cruiser
2367	1248 - Jersey City Tug
2368	1251 - Lackawanna
2369	1252 - USS Whitehall
2370	1257 - PT-212
2371	1258 - USCG 36500 36' Motor Lifeboat
2372	1259 - SC-1 Class Sub-Chaser
2373	1260 - George W. Washburn
2374	1264 - Great Lakes Freighter
2375	1268 - Jenny Lee Tug
2376	1269 - San Pedro River Pushboat
2377	1270 - City of Buffalo

### FLEX SHAFT RUNNING HARDWARE KITS

Kit#	Hardware Designed for
2326	1410/1411 (.10 gas engine - shaft size 10-32)
2327	1410/1411 (enya .09 engine - shaft size 5mm-9mm)
2333	1317 (OS Max .10 eng. - shaft size 5mm-8mm)
2334	1410/1411 (OS Max .10 engine - shaft size 10-32)
2342	1312/1314 (.40-.60 gas engine - shaft size 1/4-28)
2346	1321/1325 (.60-.67 gas engine)
2352	1316/1413/1414/1417/1420/1421/1425/1429 (.60 flex outdrive .60 eng.)
2355	1316/1413/1414/1416/1418/1419/1421 - (.150 flex outdrive .40 engine)
2356	1312/1314 - (.150 flex outdrive .40 engine - shaft size 1/4-28)

### SHAFT AND STUFFING BOX

Kit#	Description
2601	Threaded 3/16" x 8" (10-32) with Oilite Bearings
2602	Threaded 3/16" x 10-1/2" (10-32) with Oilite Bearings
2603	Threaded 1/8" x 8" (5-40)
2604	Threaded 1/8" x 10-1/2" (5-40)
2605	Threaded 3/16" x 10-1/2" (10-32)
2606	Threaded 3/16" x 17" (10-32)

### SHAFT ONLY

Kit#	Description
2701	Threaded one end 3/16" x 10-1/2" (10-32).
2702	Threaded one end 3/16" x 16" (10-32)
2703	Threaded two ends 3/16" x 17" (10-32)
2704	Threaded one end 3/16" x 24" (10-32)
2705	Threaded one end 3/16" x 18" (10-32)
2711	.130 Flex Cable & Shaft for 2326, 2327, 2334
2713	Threaded two ends (5-40) for 2314
2714	.187 Flex Cable & Shaft for 2342, 2343, 2346, 2352
2715	Replacement Stub Shaft only for 2714 & 2716
2716	.150 Flex Cable & Shaft for, 2355, 2356
2718	.187 Square Flex Drive for all .187 Installations

### STUFFING BOX ONLY

Kit#	Description
2802	12" with 2 Oilite Bearings for 3/16" Shaft
2803	7-1/4" with 2 Oilite Bearings for 3/16" Shaft
2805	5-3/8" with 2 Oilite Bearings for 3/16" Shaft
2807	3" with 2 Oilite Bearings for 3/16" Shaft
2808	14" Teflon Tube for .150 Flex Cable
2809	14" Teflon Tube for .187 Flex Cable

## Running Accessories

### STRUTS

Kit#	Description
3310	For 1321, 1314, 1325 with Needle Bearings
3312	Plastic Strut for 1/8" diameter Shaft
3313	Plastic Strut for 1/8" diameter Shaft
3314	Plastic Strut for 3/16" diameter Shaft
3317	Strut for 1211, 1213, 1214, 1218

### RUDDER HARDWARE

Kit#	Description
3503	Brass Rudder & Shaft for 1203, 1205, 1206, 1210
3504	Rudder Arm for 1/8" Shaft
3506	S/S Rudder & Shaft for 1314, 1316, 1425, 1429, 1436
3507	S/S Rudder & Shaft for 1322, 1435
3508	Rudder Arm for 3/16" Shaft
3512	Outboard Mounting Bracket with Nyliner Bearings
3515	Double Rudder Arm for 1/8" Shaft
3516	Double Rudder Arm for 3/16" Shaft
3517	Brass Rudder & Shaft for 1410, 1411
3518	Cast Rudder & Shaft for 1211, 1213, 1218, 1226

### SAIL CONTROL UNITS

Kit#	Description
3701	Probar Sail Control Unit (Motor Incl.)
3702	Sail Control Unit for Boats w/ 700 sq. in. of sail area & under - Comes Assembled

### MISCELLANEOUS HARDWARE

Kit#	Hardware Designed for
7006	Water Intake Tube 2" Long
7007	Water Intake Tube 3 1/2" Long, Threaded 10-32
7008	Water Intake Tube 2 1/2" Long, Threaded 10-32
7009	Needle Bearing for 3/16" Shaft
7010	Flanged Nyliner Bearing for 3/16" Shaft
7011	Oilite Bearing for 3/16" Shaft (Pkg of 2)
7013	Prop Drive Dog for 3/16" Shaft, Threaded 10-32
7014	Set Collar for 3/16" Shaft
7015	Set Collar for 1/8" Shaft
7016	Nylon Thrust Washer for 3/16" Shaft (Pkg of 2)
7017	Locking Prop Nut, Threaded 10-32 (Pkg of 2)
7019	Nylon Thrust Washer for 1/8" Shaft
7023	Boat Radio Antenna
7029	Close Cell Foam Self Adhasive Tape for Water-tight Radio Boxes
